Advisors:

The Math Department has instituted new guidelines for placement into Math Courses. Please carefully review the information below and reach out to Alex Duncan or Jeff Watt in the Math department (both copied) with any questions.

The Math Department has established new Math Placement Guidelines for summer and fall 2017 admits. Attached are the three documents that outline the new requirements. Please review the documents.

Note the following changes compared to previous years:

1. **SATI MSS OR SATI MA (Math)** or **ACT MA** (Math) test date scores in addition to the ALEKS placement score determine placement into the first college Math level, MATH 13000 and above. See attached chart.
   a. SAT and ACT scores are valid within 24 months of the test date. In AdRx, view the “test date” field, not “date loaded” field. The “data source” for the SAT should be “ETS” or “SCH”, not “SLF”. The “data source” for the ACT should be “ACT” or “SCH”, not “SLF”.
   
   ![Test Scores / Transfer Credit / Test Credit / Other Credit Table]

   b. The highest **SATI MSS OR SATI MA** or **ACT MA** score should be used.
   c. ALEKS score is valid within 12 months of the test date.
2. An ALEKS score of 58 or higher is required to place into MATH 13000 or higher. See the chart for the minimum SAT Math or ACT Math score required as it varies by course.
3. If a student does not have the minimum required SAT or ACT Math score for the course ALEKS placed the student into, then the student must take the prerequisite course **OR** take a proctored ALEKS test during day one of orientation.
   a. The score from a **proctored** ALEKS test waives the SAT/ACT requirement.
   b. More information to come about how and when students will be directed to this proctored test at orientation. Stay tuned.
4. Note – for transfer and international students, only the ALEKS score will be used to determine placement – SAT and ACT scores are not required for admission to IUPUI for these populations.
In addition, the SIS tables for the course requirements will be built in time for Beginner Orientation on June 1, 2016 (possibly sooner). Therefore, a student may be able to enroll in a course they are not eligible to take because SIS will not have the new prerequisite requirements programmed yet. The Registrar will be monitoring this between now and June to make sure students are in the correct courses for their test scores.

The Math Department has also established new guidelines for students who transfer in college level Math credit (MATH 11000 or MATH 11100 and above). Please see below for these guidelines:

1. **ALEKs Placement Required If:**
   a. No college level Math transferred and completed on the transcript.
   b. A college level Math course was transferred (grade of C or higher) and completed more than 3 semesters ago (excluding summer).
   c. Note – for transfer and international students, only the ALEKs score will be used to determine placement – SAT and ACT scores are not required for admission to IUPUI for these populations.

2. **Take Next Math Course in Sequence Required of Major If:**
   a. A college level Math course was transferred (grade of C or higher), distributed to an IUPUI Math class, and completed within the last three 3 semesters (excluding summer).

3. **Refer to the Math Department If:**
   a. A college level Math course was transferred (grade of C or higher), course is undistributed, and completed 3 semesters ago or less (grade of C or higher). In order to determine the next Math course for enrollment, the Math Department will articulate the transfer credit to an IUPUI course or the student will be required to take a proficiency exam for the prerequisite of the course for which they want to enroll. The decision for specific course enrollment will be communicated to the student and posted in AdRx by the Math Department as soon as a decision is made.

4. **MATH M118 Enrollment Approved If:**
   a. A completed a college level Math course was transferred (grade of C or higher), the student can enroll in MATH M118. No expiration on when the college level Math course was completed.

All of this will be further discussed at Orientation Kick-Off on Friday, May 12th. If you have any questions in the meantime, please contact Alex Duncan (duncalex@iupui.edu) or Dr. Jeff Watt (jwatt@iupui.edu) in the Math Department.
